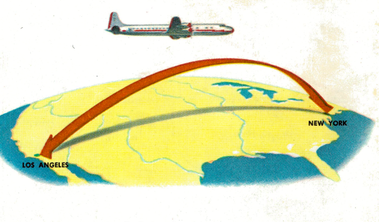
AMERICAN MAKES HISTORY WITH THE
First Nonstop Service Coast To Coast
IN BOTH DIRECTIONS



American's new DC-7 Flagship will fly you cross-country in under 8 hours. This unmatched travel time is made possible by the 365 mph cruising speed of the fastest piston-powered transport in the world. With the new DC-7, American continues to set the standard for service in transcontinental travel.

The DC-7 features many new developments designed for your comfort—special soundproofing, even more comfortable seats, and air conditioning on the ground as well as in the air. Twenty-five DC-7 Flagships will be added to the Fleet by mid 1954. This means more nonstop transcontinental service and the introduction of this superior plane to other cities throughout the nation.
